On the initial email, I provided 950 GPM for both wells, but I also wanted to give you what they are actually producing. Below is the total gallons for both wells for last year. The flow rate is about 10 GPM for Well 6 in 2015 and 100 GPM for well 7 in 2015.
Let me know if you need anything else.

	Well 6	Well 7
Jan-15	0	4,104,284
Feb-15	0	3,497,506
Mar-15	467,692	5,493,350
Apr-15	11,162	1,790,697
May-15	14,423	2,112,080
Jun-15	327,491	5,090,939
Jul-15	0	10,376,228
Aug-15	987,151	15,176,474
Sep-15	1,450,221	6,391,584
Oct-15	546,970	1,652,354
Nov-15	582,583	871,116
Dec-15	820,689	928,891
Total Flow	5,208,384	57,485,502

Jan-16	500,321	996,152
Feb-16	1,402,824	893,779
Mar-16	392,225	1,035,222
Apr-16	294,273	467,704
Total	2,589,643	3,392,857

Subject: RE: request of City Well information.

Both wells were sampled for PCE twice this year so far. We are monitoring every 3 months. Well 6 was sampled on 1/13/16 and 4/13/16 and both results were ND for PCE. Well 7 was sampled on 2/10/16 and 4/13/16 and both results were ND for PCE.

Below I have listed well information for both of the wells and I've also attached the well data from Department of Public Health for both wells. Let me know if you need anything else.

Subject: request of City Well information.

Hi Melissa,

As per our discussion, I am interested in the latest flow rates, water levels, screen intervals and PCE concentration data for City Well 6, City Well 7 and City Well 1. This information will help in our assessment of the Halford's and Elwood's PCE plumes. Thank you.

Regards,

Jim
